Tax latest:
Getting insights –
Building upon international
tax expertise

***We look forward to
welcoming you!***

Everybody is talking about global tax issues. But not every opinion which is articulated is based on a deep understanding of the underlying issues, which is why it is now more important than ever to build upon existing international tax expertise and get the leading experts of the field involved.

This is your opportunity to receive the best possible updates.

This series of seminars entitled Current Developments in European and International Tax Law is hosted by the Institute for Austrian and International Tax Law, Vienna University of Economics and Business (WU) together with PwC. Individually held seminars will give you the opportunity to gain expert insights while also making it possible to exchange views on an informal level.

Professor Michael Lang
Head of the WU Institute for Austrian
and International Tax Law

In the course of the coming academic year we are happy to once again be able to present a number of internationally renowned speakers from a variety of different countries.

Leading researchers as well as experts from the international PwC network will share their expertise and discuss current tax issues. The exact topics and programmes will be decided upon closer to the time of the event itself. This will enable us to focus on the latest relevant issues.

Subject to your registration, you will of course receive details on the themes to be discussed prior to each individual seminar. Participation is free of charge.

We cordially invite you to come along and meet top international tax experts at these exciting lectures.
